

I wrote some cases to monitor our  
customer service

Science Vocabulary  
**Different Types  
of Scientists**

# Introduction

Science is a fun **subject!**

This means there is so much to learn and study.

sci-en-tists

That is why we have many different types of scientists.

syllabication

## Warm-up

- 1) What does a scientist do?
- 2) Are there different types of scientists?
- 3) Is it difficult being a scientist?

study phenomena

chemists  
physicists  
mathematicians

who is going to pay for the research?  
social sciences  
education

# Astronomer

I would like to buy  
a telescope.

botany  
geology

Astronomers are scientists that study space. They learn about stars and **planets**. I am interested in astronomy

*Say “As tron no merr” out loud.*

# Botanist

What is a species

human

homo sapiens

Botanists are special scientists. They study all different types of plants and flowers. There are thousands of different plant **species**.      spe–cies      The Origin of the Species.

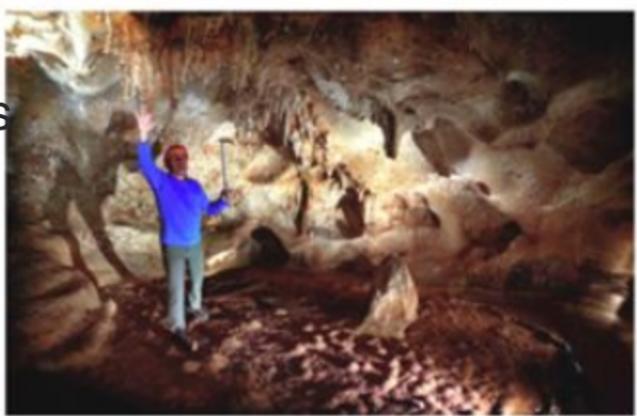

*What is your favorite flower?*

species relates to taxonomytaxo nomy means putting things into groups. Species are groups of living things.

humans  
dogs  
cats

# Geologist

Why do geologists get paid a lot of money.  
coal aluminum  
gold  
oil

A geologist studies how old the earth is. Geologists look at rocks. They also study the **history** of this planet.

4,000,000,000

**How old do you think the earth is?**

Many geologists often work for mining companies.  
orders of magnitude  
one billion is six orders of magnitude great than one thousand.

- 1,000 years
- 1,000,000
- 1,000,000,000
- one billion

# Questions

Have you heard of any of these types of scientists before?

Which scientist would you prefer to be?

# Marine biologist

biology is the study of living things  
living things need energy to survive and grow  
food

Marine biologists work with the **ocean**. They study fish and animal life in the sea.

*What lives under the ocean?*

## Vocabulary words

**planet** – a very large round object in space that moves around the sun or another star

**species** – a group of living things that share the same features

**history** – events that happened in the past

**subject** – a topic that we can learn about

**ocean** – the wide sea

# Vocabulary activity

Match the definition and vocabulary word:

Vocabulary	Definition
planet	topics like math and science
species	the study of events that happened long ago
history	a group of living things
subject	field of study field of research
ocean	the sea The largest bodies of water on Earth. a very large round object in space

# Vocabulary activity

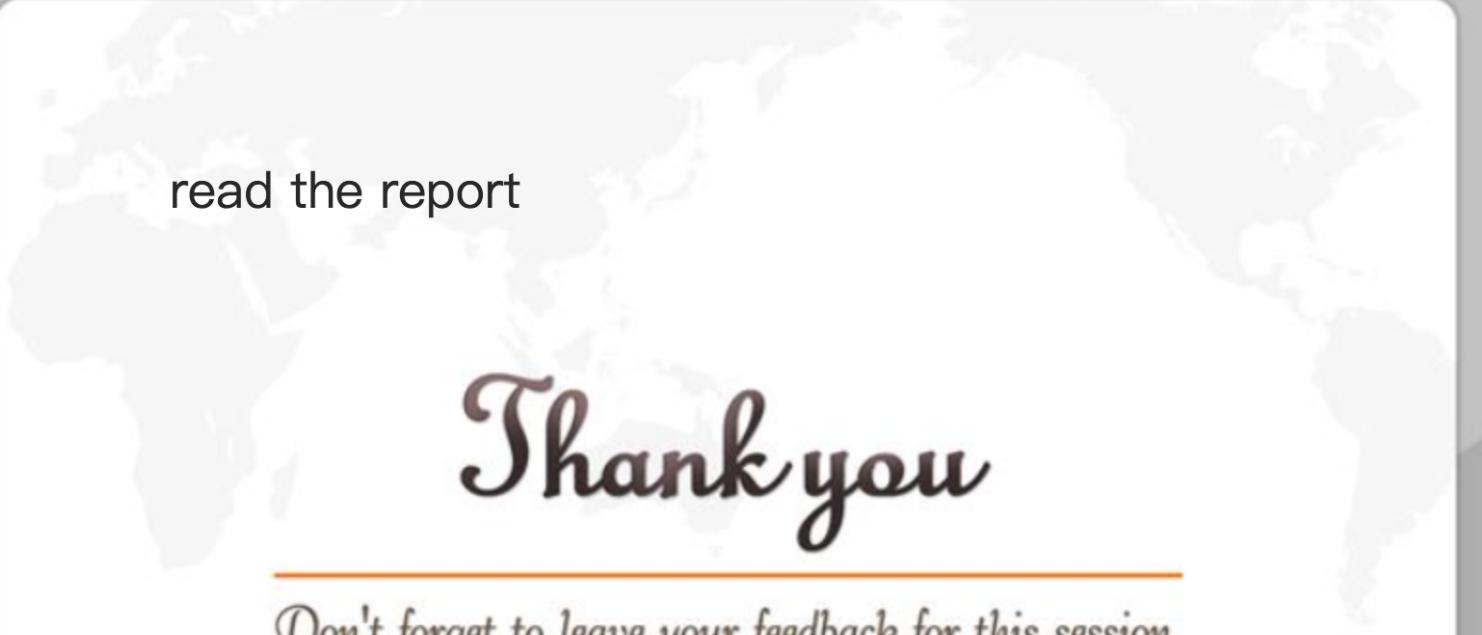

Answers:

Vocabulary	Definition
planet	topics like math and science
species	events that happened long ago
history	a group of living things
subject	the sea
ocean	a very large round object in space

## Wrap-up

- 1) What did you learn today?
- 2) How many types of scientists can you remember?
- 3) Spell two vocabulary words out loud.

Software testing which involves finding all the bugs in the software. If our customers see the bugs, that's too late. I write a robot to find the bugs by taking the code and analysing it. Parsing the syntax and grammar of the code.
